

## **HLM 7.03 release notes**

### **64 Bit statistical applications**

The eight 32 bit statistical applications for fitting the various HLM models have been replaced by 64 bit statistical applications enabling HLM 7.03 to handle large models based on a very large number of cases. On 32 bit operating systems, WHLM will call the 32 bit statistical applications instead.

### **Stat/Transfer version 14**

The data import feature has been upgraded from **Stat/Transfer** version 13 to the most recently released version 14. Version 14 has added support for the following data formats.

- Stata 15/MP
- BayesiaLab (Write Only)
- JSON-Stat (Read Only)

Version 14 has larger limits for the following data formats.

- Excel Files > 4 GB
- SAS files > 32K variables
- Stata Files > 32K variables
- dBASE > 2GB
